INDEPENDENT LOYALTY CRM CAMPAIGN CASE STUDY

The Christmas Treasure Hunt

Black Friday meets Christmas: a three-email loyalty campaign for the Treasure programme, from segmentation to measurement, built in HubSpot.

PROPOSED CAMPAIGN WINDOW
27 November – 23 December 2026

AUDIENCE
New, active and lapsed members

CHANNEL
Three emails, content by segment

TOOLS
HubSpot CRM, A/B testing, journey design

02

Campaign strategy

GOALS · AUDIENCE · IDEA · KPIs

THE CHALLENGE

How can TJX Europe keep seasonal shoppers engaged with Treasure beyond Christmas?

CORE IDEA

A treasure hunt, not a countdown of discounts. All members earn double points from Black Friday to 13 Dec; from 2 Dec each segment also gets its own reward.

TARGET AUDIENCE · SIMULATED SAMPLE OF 12,000 MEMBERS

NEW · 2,625

Encourage first redemption

Explain how Treasure works; one easy reason to visit.

Reward: £5 off £30 code

ACTIVE · 5,485

Encourage repeat visits

Gift ideas and recognition, no discount framing.

Reward: +250 bonus points

LAPSED · 3,890

Re-engage with a targeted offer

One warm invitation, capped frequency.

Reward: 10% off code

OBJECTIVES AND WHY THESE KPIs

≥ 5%

Unique CTR. Clicks, because opens are inflated.

≥ 2%

Redemptions per email. Ties email to a real visit.

≥ 5%

Reactivation rate. Lapsed members who return.

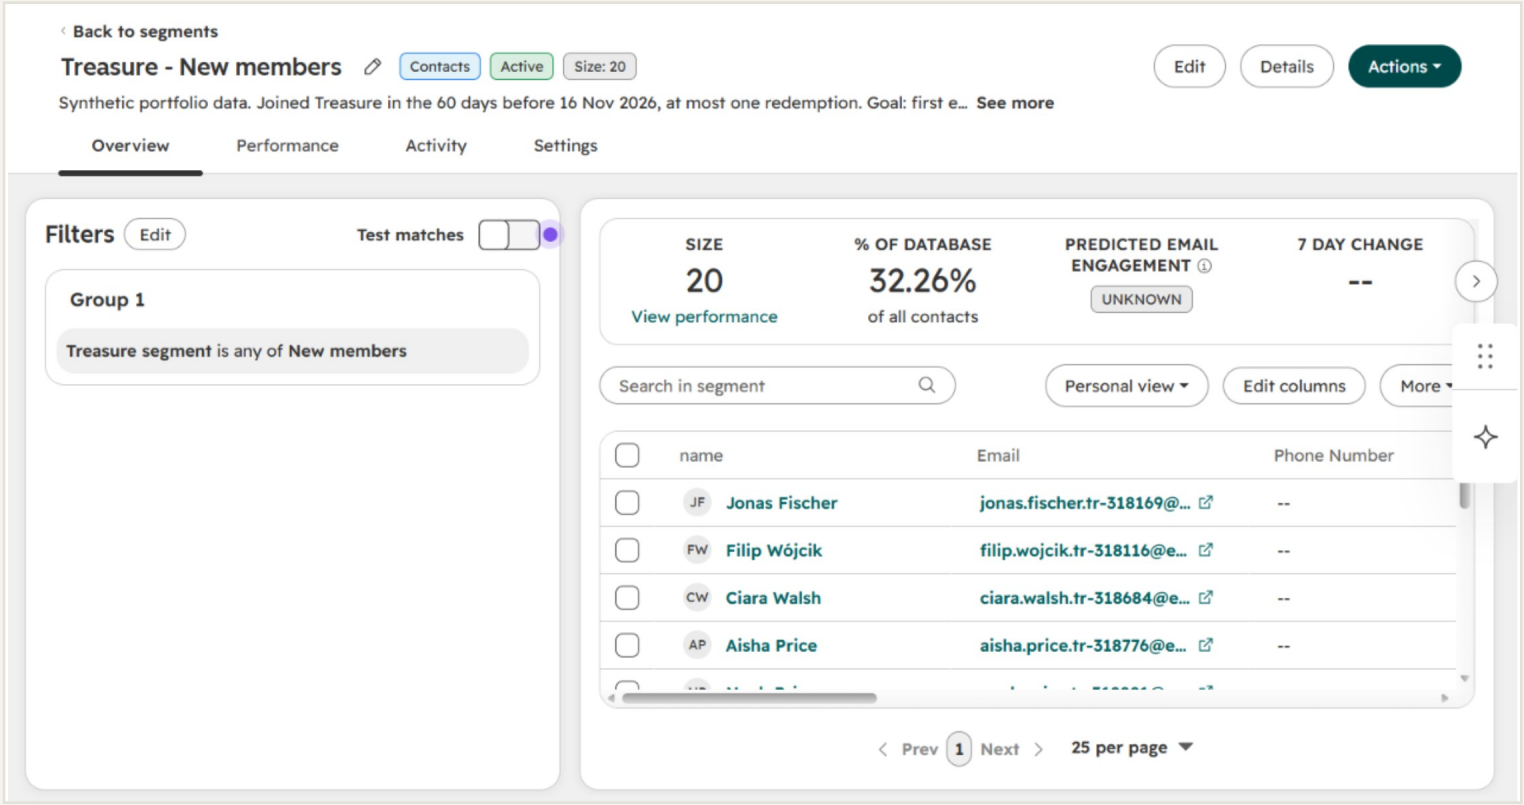

≤ 0.30%

Unsubscribe rate. Guardrail for list health.

03

HubSpot CRM implementation

BUILT IN A LIVE HUBSPOT PORTAL

Segment filter: Treasure segment is any of New members. Active list, updates automatically.

60
Synthetic test contacts

7
Custom properties

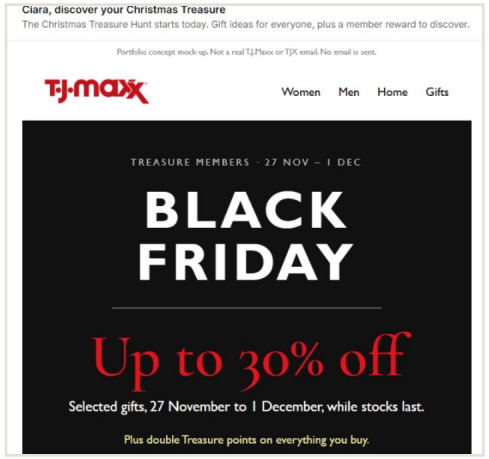

4
Segments: New, Active, Lapsed and an unengaged suppression list

3
Email templates

04

Email marketing execution

3 TEMPLATES BUILT · TESTED IN HUBSPOT

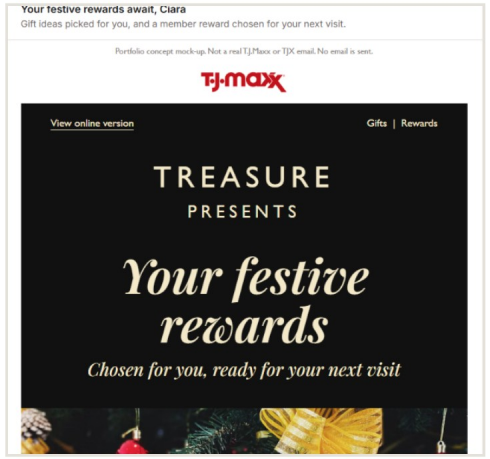

1 · BLACK FRIDAY

Subject: Ciara, discover your Christmas Treasure

CTA: Discover your treasure

Launch the hunt: sale plus double points

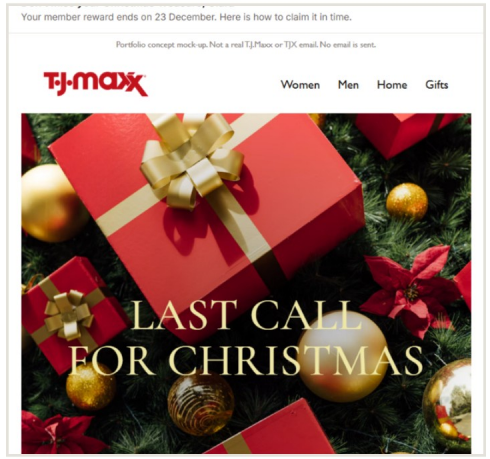

2 · EARLY DECEMBER

Subject: Your festive rewards await, Ciara

CTA: View my reward

Each segment's own reward and code

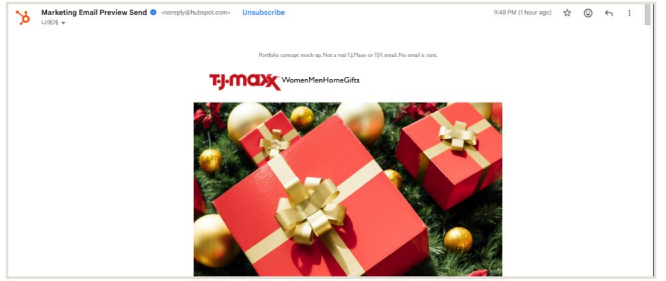

3 · MID-DECEMBER

Subject: Don't miss your Christmas Treasure

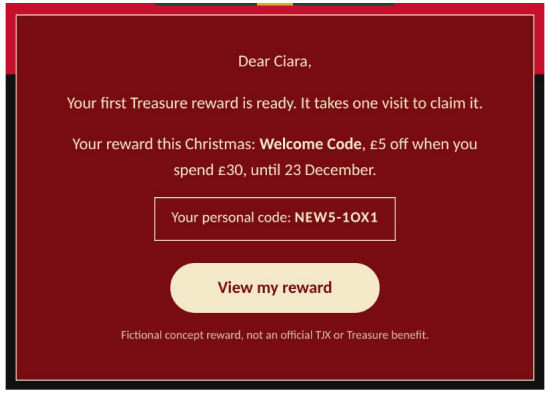

CTA: Claim before 23 Dec

Last call before rewards expire

TEST SEND · RECEIVED IN GMAIL

INSIDE EMAIL 2 · CODE AND CTA

05

Email content by segment

ONE TEMPLATE PER EMAIL · MESSAGE AND REWARD CHANGE BY SEGMENT

Segment	Email 1 · Black Friday	Email 2 · Early December	Email 3 · Mid-December
New	Welcome to your first Christmas as a member, and how to find your first reward	Your first reward is ready: £5 off £30 with a personal code	Your first reward is still waiting, with just over a week left
Active	You know the thrill of a great find: every visit could uncover a gift	Thank you, plus +250 bonus points and picks from a preferred category	Your points reward can come with your last-minute gift run
Lapsed	It has been a while; your membership is ready when you are	We kept something aside for you: a 10% welcome-back code	Your welcome-back reward is still here until 23 December

Email 3 content adapts to redemption status; redeemed members receive a thank-you message, while persistently unengaged lapsed members are suppressed.

SAME FOR EVERYONE

Layout, Black Friday sale, double points and product picks

PERSONALISED

First name, greeting, reward, personal code and terms

06

Measurement: simulated results

PROPOSED KPIs

6.4%
Unique CTR · target ≥ 5% · met

2.5%
Redemptions per delivered email · ≥ 2% · met

4.6%
Reactivation · ≥ 5% · missed

0.22%
Unsubscribe · ≤ 0.30% · met overall

RESULTS BY SEGMENT

Segment	Delivered	CTR	Redeem	Unsub
New	7,700	9.0%	2.9%	0.22%
Active	16,004	7.3%	3.1%	0.10%
Lapsed	8,107	2.1%	0.7%	0.44% over
Total	31,811	6.4%	2.5%	0.22%

Base for all rates: delivered emails. CTR 2,021 ÷ 31,811 = 6.4%; redemptions per delivered email 780 ÷ 31,811 = 2.45%. Weighted by emails, not members.

WHY REACTIVATION MISSED 5%

164 of 3,533 unique lapsed members reached returned (4.6%). Lapsed CTR was 2.1%; 46 of 260 welcome-back codes were used (17.7% code usage, vs 0.7% redemption per email).

WHAT I WOULD CHANGE

- Test a stronger welcome-back offer, sent earlier in December
- Suppress persistently unengaged contacts using click and consent signals
- Rebalance codes: the welcome-code allocation was exhausted (150 of 150)

07

A/B testing and optimisation

ILLUSTRATIVE TEST SCENARIOS · TWO-SIDED TWO-PROPORTION Z-TEST, α = 0.05

Test	A vs B	Delivered	Clicks	CTR A → B	p	Verdict
Subject line	Campaign name vs benefit	2,769 / 2,910	131 / 181	4.73% → 6.22%	0.014	B wins
CTA copy	Functional vs invitational	5,709 / 5,618	359 / 438	6.29% → 7.80%	0.002	B wins
Hero image	Product vs lifestyle	5,638 / 5,689	402 / 395	7.13% → 6.94%	0.697	No winner
Send time	07:30 vs 19:00	4,635 / 4,509	243 / 273	5.24% → 6.05%	0.093	No winner

HOW EACH TEST IS RUN

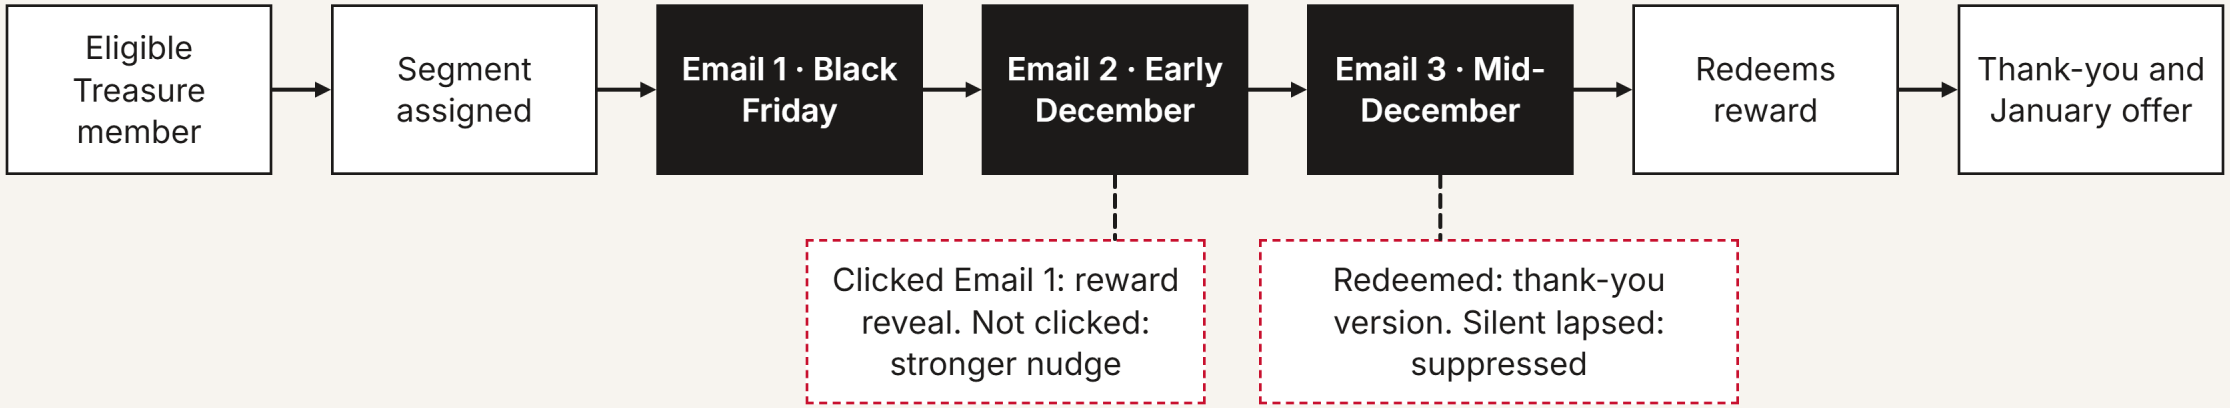

One variable per test, a written hypothesis and a decision rule set in advance: choose B only if $p < 0.05$ and unsubscribes are not significantly higher. CTA and image share the Early December send as a 2×2 design, so unique delivered emails across tests total 26,150.

OPTIMISATION PLAN

- Make benefit-led subjects and “Start my treasure hunt” the new controls
- Re-test image and send time on a full January send
- Size tests first: about 10,000–13,500 per arm for a 15% lift

08

Proposed customer journey and key takeaways

The campaign includes three scheduled emails. Engagement determines personalised content and suppression eligibility.

KEY DECISIONS

- Points and personal codes, not sitewide discounts
- Clicks and redemptions, not opens, as success measures
- Lighter cadence for lapsed; unclear tests re-tested

CAMPAIGN OPERATIONS

- **Reward fulfilment:** code stock, expiry, one use per member
- **Customer experience:** FAQ and a fix when a code fails
- **Coordination:** QA, approvals and a launch checklist

CRM SKILLS SHOWN

- Segmentation and lifecycle targeting
- Hands-on HubSpot: properties, lists, templates
- Test design, KPI reporting and optimisation
